Contents Volume 56 1998

Volume 56 No. 1 April 1998

Regular/hypothesis paper

Unifying model for the photoinactivation of Photosystem II *in vivo* under steady-state photosynthesis
J.M. Anderson, Y.-I. Park, W.S. Chow **1–13**

Regular papers

Variation in photosynthetic components among photosynthetically diverse cotton genotypes
W.T. Pettigrew, R.B. Turley **15–25**

Reaction mechanism of phosphoribulokinase from a cyanobacterium, *Synechococcus* PCC7942
A. Wadano, K. Nishikawa, T. Hirahashi, R. Satoh, T. Iwaki **27–33**

A study on the relationship between leaf conductance, CO_2 concentration and carboxylation rate in various species
M. Peisker, I. Heinemann, M. Pfeffer **35–43**

Localization of light-induced structural changes in bacterial photosynthetic reaction centers
I.A. Smirnova, A. Blomberg, L.-E. Andréasson, P. Brzezinski **45–55**

Photochemical efficiency of Photosystem II and xanthophyll cycle components in *Zea mays* leaves exposed to water stress and high light
K. Saccardy, B. Pineau, O. Roche, G. Cornic **57–66**

Leaf expansion, net CO_2 uptake, Rubisco activity, and efficiency of long-term biomass gain for the common desert subshrub *Encelia farinosa*
P.S. Nobel, H. Zhang, R. Sharifi, M. Castañeda, B. Greenhouse **67–73**

Photosynthetic electrogenic events in native membranes of *Chloroflexus aurantiacus*. Flash-induced charge displacements in the acceptor quinone complex of the photosynthetic reaction center
A.Y. Mulkidjanian, A. Hochkoeppler, D. Zannoni, L.A. Drachev, B.A. Melandri, G. Venturoli **75–82**

A comparative study of the terminal stages of chlorophyll biosynthesis before and after heavy water (D_2O) introduction into greening plant leaves
N.V. Ignatov, F.F. Litvin **83–93**

Both spillover and light absorption cross-section changes are involved in the regulation of excitation energy distribution between the two photosystems during state transitions in wheat leaf
X.-X. Tan, D.-Q. Xu, Y.-K. Shen **95–102**

Technical communication

A diffused-optics flash kinetic spectrophotometer (DOFS) for measurements of absorbance changes in intact plants in the steady-state
D.M. Kramer, C.A. Sacksteder **103–112**

340

Letter to the Editor

Verification of the Z-scheme in *Chlamydomonas* mutants with Photosystem I deficiency
V.A. Boichenko, K.P. Bader **113–115**

Volume 56 No. 2 May 1998

Regular papers

Inhibition of cytochrome *b563*-oxidation by triorganotins in spinach chloroplasts
C. Klughammer, S. Heimann, U. Schreiber **117–130**

Isolation and characterization of Photosystem I from two strains of the marine oxychlorobacterium *Prochlorococcus*
L. Garczarek, G.W.M. van der Staay, J.C. Thomas, F. Partensky **131–141**

Nonstructural carbohydrates of soybean plants grown in subambient and superambient levels of CO_2
L.H. Allen Jr., E.C. Bisbal, K.J. Boote **143–155**

The structure and function of the 33 kDa extrinsic protein of Photosystem II: A critical assessment
T.M. Bricker, L.K. Frankel **157–173**

Photosystem-II repair and chloroplast recovery from irradiance stress: Relationship between chronic photoinhibition, light-harvesting chlorophyll antenna size and photosynthetic productivity in *Dunaliella salina* (green algae)
J. Neidhardt, J.R. Benemann, L. Zhang, A. Melis **175–184**

Estimating the contribution of Photosystem I to total leaf chlorophyll fluorescence
E. Pfündel **185–195**

Excitation energy transfer in thylakoid membranes from *Chlamydomonas reinhardtii* lacking chlorophyll *b* and with mutant Photosystem I
A.N. Melkozernov, H. Su, A.N. Webber, R.E. Blankenship **197–207**

Adjustment of thylakoid plastoquinone content and Photosystem I electron donor pool size in response to growth temperature and growth irradiance in winter rye (*Secale cereale* L.)
G.R. Gray, A.G. Ivanov, M. Król, N.P.A. Huner **209–221**

Technical communication

Measurement of photosynthetic oxygen evolution with a new type of oxygen sensor
E. Tyystjärvi, J. Karunen, H. Lemmetyinen **223–227**

Volume 56 No. 3 June 1998

Minireview/Hypothesis

A knowledge-based three dimensional model of the Photosystem II reaction center of *Chlamydomonas reinhardtii*
J. Xiong, S. Subramaniam, Govindjee **229–254**

Regular papers

Central-*cis* isomers of lutein found in the major light-harvesting complex of Photosystem II (LHC IIb) of higher plants
G.E. Bialek-Bylka, Y. Sakano, T. Mizoguchi, T. Shimamura, D. Phillip, Y. Koyama, A.J. Young **255–264**

Iron deficiency causes changes in chlorophyll fluorescence due to the reduction in the dark of the Photosystem II acceptor side
R. Belkhodja, F. Morales, R. Quílez, A.F. López-Millán, A. Abadía, J. Abadía **265–276**

Fluorescence quenching in four unicellular algae with different light-harvesting and xanthophyll-cycle pigments
C. Casper-Lindley, O. Björkman **277–289**

Spectral characterization of NAD(P)H fluorescence in intact isolated chloroplasts and leaves: Effect of chlorophyll concentration on reabsorption of blue-green fluorescence
Z.G. Cerovic, E. Langrand, G. Latouche, F. Morales, I. Moya **291–301**

Structure and composition of the photochemical apparatus of the Antarctic green alga, *Chlamydomonas subcaudata*
R.M. Morgan, A.G. Ivanov, J.C. Priscu, D.P. Maxwell, N.P.A. Huner **303–314**

Orientation and excitonic interactions of the Fenna–Matthews–Olson bacteriochlorophyll *a* protein in membranes of the green sulfur bacterium *Chlorobium tepidum*
A.N. Melkozernov, J.M. Olson, Y.-F. Li, J.P. Allen, R.E. Blankenship **315–328**

Supramolecular organization of the photosynthetic chain in mutants of *Rhodobacter capsulatus* deleted in cytochrome c_2
A. Verméglio, A. Joliot, P. Joliot **329–337**

Contents Volume 56 **339–341**

Author index Volume 56 **342**
